

HEALTHY

FREE PROSTATE CANCER SCREENING

Wednesday, September 9, 2026 | 3 - 5 pm

Spanish American Center

112 Spruce Street, Leominster, MA 01453

Why is this screening so important?

Prostate cancer is one of the most common cancers among men, especially as they age. Unfortunately, many men delay or skip routine health checkups due to cost, lack of insurance, or busy schedules.

Here is the good news:

Early Detection Saves Lives:

When caught early, prostate cancer is highly treatable.

Knowledge is Power:

A simple screening takes just a few minutes and gives you peace of mind.

Do It for Them:

Take care of your health today so you can be there for your children, grandchildren, and loved ones tomorrow.

This is a screening test and is not a substitute for a more thorough examination and consultation by your personal physician.

Participants in the screening will be notified of the results by our team of nurse navigators. Participants are responsible for arranging follow-up care with their personal physician.

This screening is voluntary and free of charge.

Walk-ins welcome
