

# UMass Memorial Center for Complex Aortic Disease

The Center for Complex Aortic Disease is directed by Andres Schanzer, MD. Dr. Schanzer is an accomplished vascular surgeon who has received additional training from pioneers of complex endovascular surgery at several leading centers around the world.

In addition, he has been the principal investigator on nine clinical trials for the treatment of complex aortic aneurysms. He is one of only a very small group of surgeons in the United States to develop a physician-sponsored clinical trial evaluating custom made endografts and physician-modified endografts that allow for the endovascular treatment of aneurysms not suitable for treatment with commercially available devices.

## Location

---

UMass Memorial Medical Center - University Campus  
55 Lake Avenue North, Worcester, MA 01655  
Telephone: 508-856-5599
